| Covering material                                | Polyester, 257 g/m <sup>2</sup>        |                                          |                                              |
| Acoustic properties of the PET panel             | NRC 0.85* / ISO 354:2003               |                                          |                                              |
| Reaction-to-fire classification of the PET panel | B-s1,d0* / EN 13501-1:2018             |                                          |                                              |
| Construction                                     | Freestanding, modular                  |                                          |                                              |
| Panel connection                                 | Zippers                                |                                          |                                              |
| Mesh pockets                                     | 2                                      |                                          |                                              |
| Warranty                                         | 3 years                                |                                          |                                              |

\* The parameters refer to the PET panel tested under the conditions specified in the respective test reports. An NRC value of 0.85 was obtained for a 9 mm PET panel in accordance with ISO 354:2003 with a 200 mm air gap. The B-s1,d0 classification according to EN 13501-1:2018 applies to the PET panel in the configuration specified in the test report.
