

## Avtek Soundbar 80

Avtek

Inspire | Engage | Lead

Ensure high-quality audio in your living room, conference room, or educational space. The elegant **Avtek Soundbar 80** is a versatile device that dramatically improves the sound quality coming from a TV or interactive monitor. Its design conceals advanced components that guarantee clear dialogue and cinematic sound, all while maintaining a minimalist and space-saving footprint. It is the perfect solution for those seeking great sound without the need for complicated installations.

**Powerful and personalized sound (80 W RMS).**

The soundbar is driven by four carefully tuned drivers (two full-range and two woofers), which guarantee dynamic and clear audio. The built-in DSP processor provides you with preset modes (Music, Movie, Dialog) as well as additional treble and bass control. This allows you to adjust the audio characteristics to the currently played media with a single click on the remote.

**Wide range of connections and a convenient display.**

The device offers a full array of ports tailored to your needs. You can easily connect it to various equipment using the optical connector (TOSLINK), the 3.5 mm minijack input, or the USB port for file playback. The greatest convenience is provided by the HDMI ARC connector, which allows you to connect the soundbar to a TV or monitor and operate it with a single remote control. Managing these inputs is made easy by a digital display, where you can instantly check the currently active audio source.

**Wireless freedom and a complete mounting kit.**

Listen to your favorite music without limits by connecting wirelessly to smartphones and laptops using the stable Bluetooth 5.0 module. The Avtek Soundbar also saves you time and money – in the box, you will find everything necessary for immediate setup: a remote control, a set of audio cables (optical and analog), and brackets that allow for secure and aesthetic wall mounting.
