

The MBK106V mounting bracket is specially designed for mounting the VEXO106 speaker. This optional clever U-brackets allow the easy installation of the VEXO106 both horizontally and vertically. Thanks to the dual slotted design, the VEXO106 can be mounted two different positions. The rear slot provides an installation closer to the mounted surface that gives clear and neat impression.

Included hardware:

Drop safety wire

M8 screws with

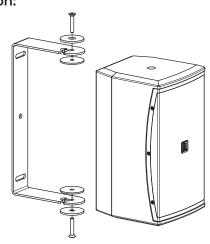

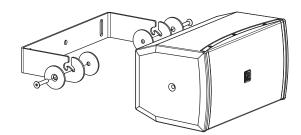

Rubber washer

Metal washer

Installation:

Step 1:

Mount the U-bracket at a designated location on the wall or ceiling.

The screws are inserted into the holes provided on the bracket. Use the correct fasteners for the surface on which the bracket is to be mounted.

Caution

Choose fasteners that are consistent with all local build codes and requirements to support the weight of the loudspeaker.

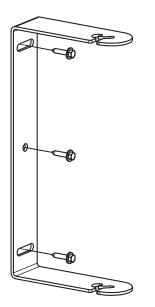

Step 2:

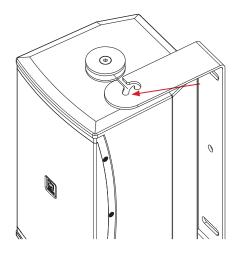

Insert the M8 bolts through the rubber and metal washers and into the center threaded holes (top and bottom). The U-bracket will be placed between those rubber washers and speaker should be placed to the desired slots.

The bolts should stay up just high enough so that the intended slot in the bracket can be hooked in. Place the speaker in the correct position and tighten both M8 bolts.

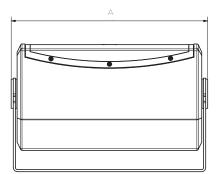

Attach the drop safety wire to one of the M10 flying points. The other end of the wire is attached to a separate mounting point on the wall.

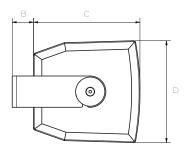

Place the VEXO106 in your desired pitch angle and tighten the bolts.

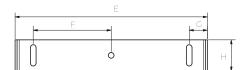

Dimensions:
